# Foreword

The guide provides customers of Clearstream Banking with an overview of the reports available via Xact File Transfer in PDF format. This includes all delivery options: Xact File Transfer via VPN, Xact File Transfer via SWIFTNet File Act and Xact File Transfer via Internet.

All reports in PDF format are based on ISO 15022 SWIFT standards hence the message type in the report title. SWIFT tags have been replaced by a short field description but otherwise the content of the report is with a few exceptions identical to that of the SWIFT message.

## How this guide is organised

This guide is organised as follows:

- Section [“1. Introduction”](#) on page 1-1 describes receipt of reports in PDF (human readable) format.
- Sections 2-6 describe each of the reports in PDF format, under the following headings:
  - [“2. Cash reports”](#) on page 2-1
  - [“3. Settlement reports”](#) on page 3-1
  - [“4. Custody reports”](#) on page 4-1
  - [“5. Triparty Collateral Management reports”](#) on page 5-1
  - [“6. Miscellaneous reports”](#) on page 6-1.

# 1. Introduction

The PDF (Portable Document File) format is a file format that has captured all the elements of a printed document as an electronic image that you can view, navigate, print or forward to someone else. It is a universal file format that preserves all fonts and formatting. To view the files, you need the Adobe Acrobat Reader, which you can download free of charge from the Adobe web site.

Customers can use Xact Web Portal to define and submit their reporting requirements directly as scheduled report requests for retrieval via Xact Web Portal, Xact File Transfer or Xact via SWIFT.

Reports scheduled in PDF for multiple accounts will be grouped within a single PDF file. If you select more than one account during the same subscription, you will receive one PDF file. However, reports generated in the same subscription will only be grouped if they share the same mode and frequency; that is, for example, a daily delta report and a monthly complete report will never be grouped. Accounts that are grouped are accessible by a bookmark, which is activated on opening the PDF file.

## Report naming convention

The naming structure for PDF files is as follows:

ACCOUNT.CUSTOMERREPORTNAME.REPTYP.FREQ.MODE.ENDPERIOD.BDATE.REPORTID.PDF

where:

**ACCOUNT** = Customer account number (5 Digits). For multiple accounts, this reverts to **MULTI**.

**CUSTOMERREPORTNAME** = Customer Report Name. This is the name that is input by the customer at the report subscription within Xact Web Portal (maximum 60 characters).

**Note:** CUSTOMERREPORTNAME can contain only characters that are supported by UNIX file names.

**REPTYP** = Report type. This can have the following values:

CACONF, CANOTIF, CASHBAL, CIRPR, INTERIMMONEYSUSP, IPAR, MIS, MONEYSTMT, MONEYSUSP, SLBC, STMNTOFALLGMNT, STMNTOFHOLD, STMNTOFPEND, STMNTOFREPR, STMNTOTXN, TRPCOLGIVSTMNT, TRPCOLRECSTMNT, USTAXALL, USTAXNONUSPERSON, USTAXUSPERSON, UUNOTIF

**FREQ** = Report frequency. This can have the following values:

ALWAYS, CONT, INTRADAY, DAILY, WEEKLY, MONTHLY, QUARTERLY, YEARLY

**MODE** = Either Complete or Delta

**ENDPERIOD** = Business day processing time (HHMM). This can have the following values:

0000, 0100, 0200, 0300, 0400, 0500, 0600, 0630, 0730, 0800, 0830, 0930, 1000, 1030, 1130, 1200, 1300, 1330, 1400, 1430, 1530, 1600, 1630, 1700, 1730, 1800, 1930, 2000, 2100, 2115, 2200, 2230, 2300  
or, if FREQ = ALWAYS or CONT, the effective report generation time.

**BDATE** = Business date (YYYYMMDD)

**REPORTID** = A number uniquely identifying the generated report (internal technical number)

**PDF** = File extension: fixed = **PDF**

# MT950 - Cash Balance Report

## Availability and timing

The MT950 Cash Balance report is available in Complete and Delta forms multiple times intraday and, in Complete form only, at end of day on a Daily, Weekly, Monthly, Quarterly, or Yearly basis.

## Report content

The MT950 Cash Balance report contains, for all currencies selected at subscription level, an opening/closing balance and other balances.

- Complete reports:

Customers can choose to report all or specified currencies open on the account, with the additional option to exclude currencies for which the balance is zero. A zero balance will nevertheless be reported if it became zero since the last report.

- Delta reports

Customers can choose to report all or specified currencies open on the account. A zero balance will not be reported unless it became zero since the last Complete or Delta report.

## Report sorting

The MT950 Cash Balance report is sorted by currency code.

## MT950 - Detailed field descriptions (Cash Balance)

The report is composed of two sections:

- Section 1 - Report header: general information;
- Section 2 - Report content: a series of sub-balances.

If zero balances have been requested, all currencies selected at subscription level will be reported with all sub-balances unless a sub-balance has been zero for the last thirteen months.

If zero balances have not been requested, only currencies with a non-zero booked balance will be reported unless it became zero since the last report. Also, a sub-balance is only reported if non-zero or if it became zero since the last report.

The MT535 Statement of Holdings report is available either as a single report or consolidated statement in Complete and Delta forms multiple times intraday and, in Complete form only, at end of day on a Daily, Weekly, Monthly, or Yearly basis.

## Report content

Clearstream Banking uses the MT535 Statement of Holdings report to report on the holdings that it services for the customer. The report can contain all holding information (Complete) or only changes since the previously sent report (Delta).

At subscription level, customers can select to receive zero balances:

- On a complete report, this means the report will contain all securities for which there was a non-zero position in the last thirteen months.
- On a delta report, a security for which the position has become zero since the last report will automatically be reported.

Customers also have the option to receive zero sub-balances: if selected, the report contains sub-balances that have become zero since the last report or that have been impacted by movements.

Customers can also select to receive the holding and collateral value per security in EUR, USD, or the currency of the instrument and the total holding value in EUR or USD. These three parameters are indicated on the bottom of each pages of the report.

## Report sorting

The MT535 Statement of Holdings report is sorted by ISIN or Common Code based on account setup.

## Consolidated report

The MT535 Statement of Holdings report can be scheduled as a consolidated statement including all positions held by all accounts selected in the subscription aggregated at the security level.

## No holdings to report

If there are no holdings to report, an MT535 Statement of Holdings report is provided containing only the header section.

## MT535 - Detailed field descriptions

The report is composed of three sections:

- Section 1 - Report header: general information;
- Section 2 - Report content: information on each security being reported;
- Section 3 - Report content: holding value per balance type and currency of instrument and total nominals per instrument type and currency; and, if selected the list of accounts in the Consolidated statement.

# MT536 - Statement of Transactions Report

## Availability and timing

The MT536 Statement of Transactions report is available in Delta form multiple times intraday and, in Complete form only, at end of day on a Daily, Weekly or Monthly basis.

## Report content

The MT536 Statement of Transactions report contains transactions that have settled since the last report. A customer's positions might be impacted by any of the following transactions:

- An over-the-counter (OTC) trade;
- A Stock Exchange (SE) trade;
- A custody event;
- Another customer's activity such as transfer, loan, collateral etc.;
- An internal Clearstream Banking settlement activity (Lending, Borrowing, blocking of securities).

## Report sorting

The MT536 Statement of Transactions report is sorted first by currency code. Stock Exchange trades are then listed first, followed by the OTC trades.

## No transactions to report

If there are no settled transactions to report, an MT536 Statement of Transactions report is provided containing only the header section.

## MT536 - Detailed field descriptions

The report is composed of two sections:

- Section 1 - Report header: general information;
- Section 2 - Report content: information on transactions that have settled since the last report.

For each security, an opening and closing balance is provided.

**Note:** Lending, borrowing and collateral activity are reported as delivery and receipt transactions free of payment but do not impact the aggregate balance. (For example, securities that are lent are debited from the "Available" sub-balance and credited to the On Loan sub-balance.) Therefore, if the transaction reflects an inter sub-balance movement, the opening balance +/- the movements may not result in the closing balance.

# MT537 - Statement of Pending Transactions Report

## Availability and timing

The MT537 Statement of Pending Transactions report is available in Complete and Delta forms multiple times intraday and, in Complete form only, at end of day on a Daily, Weekly, or Monthly basis. The report is also available on a Continuous basis, 24 hours a day, at fixed intervals and consists of up to four updated reports per hour.

## Report content

The MT537 Statement of Pending Transactions report contains all transactions that are pending on the account or that have been cancelled (reported once).

CBL uses the ISO 15022 standard to report the processing, matching and settlement statuses of an instruction. The status code may be accompanied by a reason code to further describe the status.

Each transaction is reported with its last or most relevant status/reason.

## Report sorting

The MT537 Statement of Pending Transactions report is sorted by status, in the following order:

- Instruction Processing statuses (last or most relevant)
- Matching statuses
- Settlement statuses

Transactions with the same status/reason are then sorted by security code.

## No transactions to report

If there are no pending transactions to report, an MT537 Statement of Pending Transactions report is provided containing only the header section. Empty reports will not be reported if the customer has subscribed to Continuous reporting.

## MT537 - Detailed field descriptions

The report is composed of two sections:

- Section 1 - Report header: general information;
- Section 2 - Report content: information on transactions that are pending (Complete report) or transactions whose status has changed since the last report (Delta report).

# MT564 - Income Pre-Advice Report (IPAR)

## Availability and timing

The MT564 Income Pre-Advice Report (IPAR) is available in complete form after 03:00, after 08:00, after the day-time processing (around 19:30) and at 22:30, providing information about future cash and securities proceeds and capital repayments for all the securities that are held in their accounts.

Customers can also subscribe to the Continuous IPAR in delta form that includes important payment details that have been updated (for example, rate, record date) on the business day prior to value date (VD-1).

## Report content

The MT564 IPAR contains information on future income proceeds and capital repayments for all securities held on the account. Any income, non-income and redemption payments that are not paid on the expected payment date continue to be reported up to payment but for a maximum of 30 calendar days after the expected payment date.

The report covers the dividend payments, interest payments and redemptions, both partial and final, that are expected in the five business days following the report on a rolling basis. Entitled balances (on record date) are fixed after the daytime processing that reflects the end of day balances. Two types of IPAR are available:

- The **Complete** report covers all cash and securities proceeds and redemptions, both partial and final that are expected to be payable to the account during the succeeding five business days.
- The **Delta** report covers only those proceeds that are new and/or changed since the last report that was retrieved, thereby allowing easier identification of new items and reducing reporting costs. The Delta report does not include totals at the end of the report.

When subscribing to the IPAR, you can choose whether these reports should include or exclude pending trades. You can select to receive only specific event types; all or only specific currencies; and information for a period between one and five days in advance.

The IPAR is based on the most accurate and comprehensive information available to CBL at the time of the report, but the final amount or quantity payable may vary owing to the settlement of transactions or to factors that are outside the knowledge and/or control of Clearstream Banking.

The IPAR is not a confirmation of payment, but rather a projection of funds to be expected that will be subject to the conditions for income proceeds specified in the CBL Customer Handbook.

## Report sorting

The MT564 IPAR is sorted by payment date followed by payment ISO currency code, security code and event type.

## No transactions to report

If there are no future proceeds or capital repayments to report, an MT564 IPAR is provided containing only the header section.

## MT564 - Detailed field descriptions (IPAR)

The report is composed of four sections:

- Section 1 - Report header: general information;
- Section 2 - Report content: information on future income proceeds and/or capital repayments;
- Section 3 - Report content: summary information on future income proceeds and/or capital repayments;
- Section 4 - Report content (on complete reports only): summary of total entitled amount per payment date and currency.

# MT564/568 - Corporate Action Notification

## Availability and timing

The timing of pre-notifications and notifications is largely dependent on the type of corporate action event and how much notice Clearstream Banking has received. Typically, the following approach is adopted:

### Pre-notifications

Pre-notifications are sent to customers between the announcement date and the record date to advise them of a prospective securities event entitlement.

### Notifications

Notifications are sent to customers on or after record date to advise them that they have received a securities event entitlement based on their holding on record date. For corporate action events that are not subject to a record date, Clearstream Banking will send notifications to customers upon receipt of the information.

The majority of reports are released in Clearstream Banking's batches at 08:00, 11:00, 14:00, 16:00 and 20:00 (Central European Time). However, notifications that require urgent attention are released throughout the working day.

Subscriptions may exclude securities in default when selecting "For income events, exclude securities in default". This will only affect event types CAPD, DECR, DRAW, DVCA, EXWA, INTR, PCAL, PRED and REDM.

## Amendments

As soon as Clearstream Banking becomes aware of changes in the conditions of a corporate action event for which a notification has been sent, a subsequent notification with function "Replacement" is sent to the entitled holders.

## Reminders

Reminders are sent to those customers who have not yet sent their instructions. A reminder is sent with function "Reminder" to entitled holders on the fifth business day prior to the Clearstream Banking deadline date. Additional reminders are sent on case by case basis and, if necessary, closer to the deadline.

# MT566 - Corporate Action Confirmation

## Availability and timing

The MT566 Corporate Action Confirmation is sent throughout the day at the time of payment execution.

## Report content

Corporate Action Confirmations are sent to advise the amounts and quantities of cash and/or security proceeds that are posted to the account for income and non-income events.

The MT566 Confirmation of Income and Redemption Proceeds and MT566 Corporate Action Confirmation services are aligned as elements of the same standard service. Each credit/debit is reported separately and reversals to posted entries are also reported with cross-references to the initial event in each case.

Proceeds are credited subject to confirmation from Clearstream Banking's depository, of receipt of the securities and/or cash.

An MT566 will be sent for each instruction option received from the customer. If the customer's instruction contained multiple options (for example, Exercise, Sell Entitlement), a confirmation will be sent for each option.

**N.B.:** Compensations are reported and can be identified by the presence of Market Claim amount in the Cash Movement subsequence

## MT566 - Detailed field descriptions (Corporate Action Confirmation)

The report is composed of two sections:

- Section 1 - Report header: general information;
- Section 2 - Report content: information on corporate action events and postings.

# Market Claims Report (MCR)

## Availability and timing

The Market Claims Report is available after daytime processing (around 19:00 CET) in complete or delta versions.

## Report content

A Market Claim (or compensation) is created when the actual settlement of a security trade takes place after the entitlement date of an associated income or non-income distribution to which the buyer of the security is entitled. Proceeds are distributed to effective holders of securities on entitlement date without always taking the late settlement of security trades into account.

The Market Claims Report provides a complete overview, account by account, of all potential market claims related to a customer's trades in securities. Market claims will be reported starting from the record date of a related event up to the settlement of the related pending security instruction, and, if Clearstream Banking processes the payment resulting from a market claim, reporting will continue until Clearstream Banking has executed the payment.

Payments stop being reported if the instruction or the payment has been cancelled. A market claim will be reported for a maximum of 32 calendar days after payment date of the related event.

A new version of the report will be available after daytime processing on each Clearstream Banking business day.

Two types of Market Claims Report are available:

- The Complete report covers all currently valid market claims.
- The Delta report covers only new market claims and market claims that have changed since the last report.

## Report sorting

The Market Claim Report is sorted by market, event type, record date and ISIN/CC (depending on the customer profile)

## No transactions to report

If there are no market claims to report, an empty report is provided containing only the header section.

## Market Claims - Detailed field descriptions

The report is composed of two sections:

- Section 1 - Report header: general information;

# Corporate Actions Reference Data Report

## Availability and timing

The Corporate Action Reference Data Report is available daily at 06:00 CET.

## Report content

The content of the report is based on the MT564/568 Corporate Action Notification.

It contains information on Corporate Action Notifications and Income Pre-advice (up to 5 days in advance) even if customers do not have any holding in the securities.

It is produced for the list of securities that customers must submit using Xact File Transfer via Internet when scheduling the report. Alternatively, the Corporate Action Notifications reported can be produced for the list of securities blocked in Triparty Repo transactions. In this case, no list of securities must be provided to Clearstream Banking.

Two types of Corporate Action Reference Data Report are available:

- The Complete report shows all active Corporate Action Notifications and Income Pre-advice (up to 5 days in advance) found for the listed securities (or securities Blocked for Repo)
- The Delta report shows only active Corporate Action Notifications and Income Pre-advice (up to 5 days in advance) found for the listed securities (or securities Blocked for Repo) that are new or changed since the last report was produced. The Delta report allows easier identification of new items and may reduce reporting costs.

Subscriptions may exclude securities in default when selecting "For income events, exclude securities in default". This will only affect event types CAPD, DECR, DRAW, DVCA, EXWA, INTR, PCAL, PRED and REDM.

## No transactions to report

If there are no Corporate Action Notifications or Income Pre-advice to report, only the header is shown. The report content shows "No Activity".

## Corporate Action Reference Data Report - Detailed field descriptions

The report is composed of five sections:

- Section 1 - Report header: general information
- Section 2 - Report content: information on live Corporate Action events and Income Pre-advice
- Section 3 (optional) - List of securities without any live event
- Section 4 (optional) - List of inactive Corporate Action events and Income Pre-advice
- Section 5 (optional) - List of withdrawn Corporate Action events and Income Pre-advice.

## 5. Triparty Collateral Management reports

The following table lists the Triparty Collateral Management reports available via Xact File Transfer in portable document format (PDF).

Report	Intraday	Daily	Weekly	Monthly	Quarterly	Yearly	Complete	Delta
Triparty Collateral Management Daily Exposure Report		✓						
Triparty Collateral Management Summary reports		✓						
Triparty Collateral Management Securities Forecast Report		✓						
Euroclear Collateral Management Instruction reports		✓						
Triparty Collateral Management Custody Events Report		✓						
Triparty Collateral and Exposure Statement (MT569)	✓	✓						

All reports are available at the start and at the end of the day except for the Euroclear Instruction Repo reports, which are generated upon receipt of seller's instructions.

### Triparty Collateral Management Daily Exposure Report

This report details each outstanding collateral management transaction and indicates the margin deficit or the margin excess (net exposure) for that transaction. Each item of collateral is listed with its:

- nominal amount;
- composite rating at Clearstream Banking;
- price;
- accrued interest;
- margin;
- marginal value; and
- security value.

### Triparty Collateral Management Summary reports

These reports are:

- **Triparty Collateral Management Collateral Giver Summary report**

This report summarises the status of all the Collateral Giver's open transactions and all notified trades against all counterparties in Clearstream Banking; it also summarises the net exposure against each of the Giver's counterparties by product.

- **Triparty Collateral Management Collateral Receiver Summary Report**

This report summarises the status of all the Collateral Receiver's open transactions and all notified trades against all counterparties in Clearstream Banking; it also summarises the net exposure against each of the Receiver's counterparties.

## Triparty Collateral Management Securities Forecast reports

These reports are:

- **Summary Report**

This report is intended for Clearstream Banking AutoAssign Collateral Givers. It gives a snapshot of the potential trading capacity for each counterparty. It takes into account the eligibility profiles set by the relevant Collateral Receivers and shows capacity, both including and excluding securities, which are due to return to the Collateral Giver's Clearstream Banking account as a result of closing triparty collateral management transactions. The information is also organised by security rating and type.

- **Detailed Report**

A detailed report showing eligible securities is also available on an ad-hoc basis, upon request from the Collateral Giver. For an indication of the potential trading capacity with existing counterparties using an alternative portfolio (either within or outside Clearstream Banking), Sellers may request a sample forecast report by providing a list of security codes (ISIN or common code) and nominal values.

## Euroclear Collateral Management Instruction reports

This report is generated when the Collateral Giver gives the list of securities to be delivered to or received from Euroclear to collateralise a Clearstream exposure. Details shown include the instruction type, account number, details of the security, the nominal amount, cash amount, currency, and the deal reference.

## Triparty Collateral Management Custody Events Report

This report, which is produced upon request from the Collateral Giver, shows details of coupon payments and redemptions due on securities held in the Collateral Receiver's triparty collateral management account. Details shown include the Collateral Giver's Clearstream Banking account number, details of the security, the record and value date and the net payable amount.

The publication "Triparty Collateral Management Service - Technical release notes" provides further details of the contents of these reports.

## Triparty Collateral and Exposure Statement (MT569)

The MT569 report provides an overall summary of the Triparty Collateral Management activity with a breakdown per service type. For each service type a further breakdown by contract is given.

Optionally, all open exposures per contract are provided with the list and valuation of each piece of principal and collateral.

# Urgent Uninstructed Notifications Report

The Urgent Uninstructed Notifications report gives an overview of partially or fully uninstructed balances, together with the detailed breakdown of instructed balances per option.

Each report is updated with the latest balance information available in Clearstream Banking. Customers can specify the reporting period by selecting the number of business days before the Clearstream Banking event deadline. It is possible to select a date from the first notification sent or up to 21 days before the deadline and up to 3 days after the deadline. Customers can also specify which custody events are to be included in the report, as follows:

- All; or
- Corporate Actions; or
- Tax Certifications.

## Availability and timing

The Urgent Uninstructed Notifications report is available in Complete form only, with possible timings (CET) 6:00, 10:00, 12:00, 14:00, 16:00, 18:00, 20:00.

## Report content

Uninstructed notifications are reported until they are completely instructed or until the DTP of the second day after the Clearstream Banking deadline date for instructing. Completely instructed corporate action events for which the customer has instructed with "No Action" for at least part of the balance will be reported until the DTP of the second day after the Clearstream Banking deadline.

## Report sorting

The Urgent Uninstructed Notifications report is sorted by Missing instructions related to Corporate Actions, Missing instructions related to Tax Allocations and Tax Certifications, and ascending Clearstream Banking deadline.

## No uninstructed balances to report

If there are no uninstructed balances to report, an Urgent Uninstructed Notifications report is provided containing only the header section.

## Detailed field descriptions

The report is composed of two sections:

- Section 1 - Report header: general information;
- Section 2 - Report content: information on uninstructed notifications.
